

MKOM IGBO - CH FALLACY PROOF

Thesis: Standard 36-letter Igbo orthography collapsed distinct phonemes

Core Proof: *cuo* /k^uo/ (mould soil) - u is labialization /^u/ not vowel

Therefore *ch* = *c* + *h* (aspiration), NOT a single letter!

Missing: *zh* /^u/ *azh^ua* (market), *gh* /^u/ *aghara*, *ts* /t^us/ *tsara* (answer)

Tone: *ákwá* (egg) vs *àkwà* (cloth) vs *ákwà* (cry) - meaning changes

Platform: *mkomigbo.com* - 6 domains, 43 present alphabets

Built: Aba, Abia State, NG - 2026

GitHub: github.com/mkomigbo24-debug/mkomigbo-python

Live: 127.0.0.1:8000/ - 200 OK - All 6 apps working
